Stone Guard

Patent #3,171,236

WHAT IT IS AND WHAT IT DOES

An extruded plastic protective guard molded in the exact shape of the popular FW 65 grinding wheel. With 3/4" arbor to fit all angle spindle grinders.

ADVANTAGES AND USER BENEFITS

Enables operator to grind and polish tight to the wall without fear of scratching or scoring the finished wall surface, resulting in less costly, more productive edge grinding. Helps protect operator from flying debris in the event of stone breakage. Wears at the same rate as the abrasive wheel. A must when edge grinding and polishing next to tile, door frames, and all other surfaces that need to be protected.
